

Video Wall Management & KVM Operations Made Simple

ONE PLATFORM. ANY SOURCE. ANY DISPLAY.

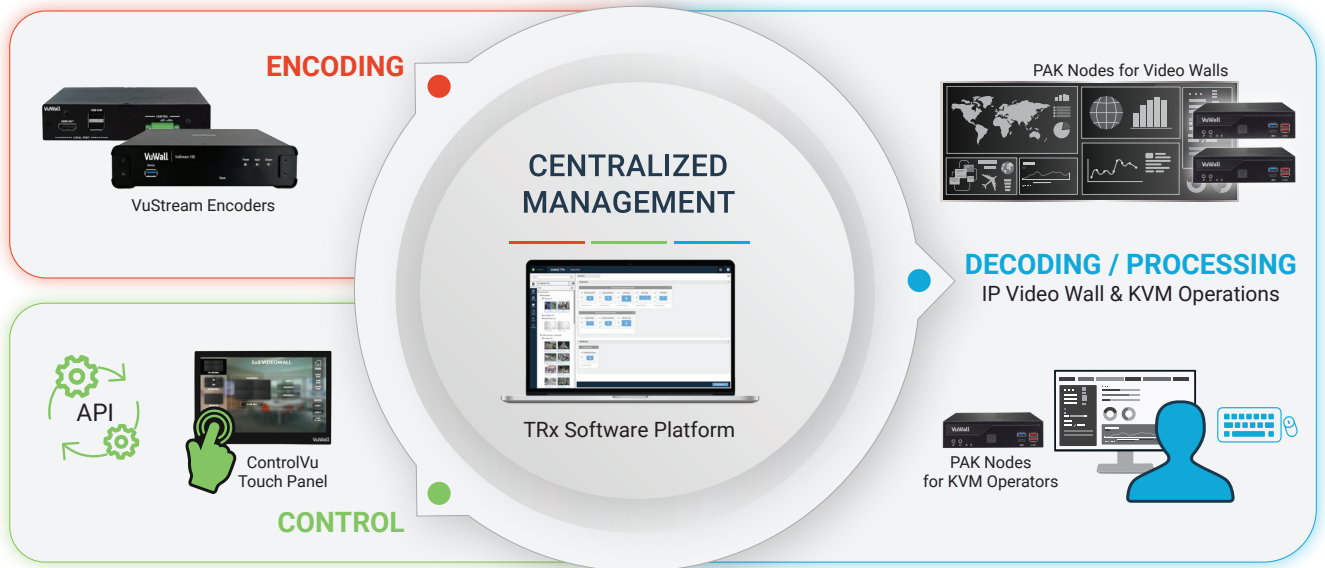

Control what you see.

VuWall

The VuWall Ecosystem

Video Wall Deployments Redefined

VuWall offers a complete ecosystem of interoperable products built on a unique standards-based architecture ensuring the most effective distribution of visual information from any source to any display across organizations. At the heart of this ecosystem is the TRx Centralized Management Platform, a unified software solution designed to meet all visualization needs, combining advanced video wall management and KVM operations to provide secure, scalable, and reliable control room technology.

THE MOST EFFECTIVE DISTRIBUTION of Any Source to Any Display

Flexible & Scalable

User Friendly

Secure & Reliable

Distribute

Stream sources from computers, remote desktops, and cameras to any multiview display.

Visualize

Efficiently aggregate content on single displays or multi-surface configurations.

Manage

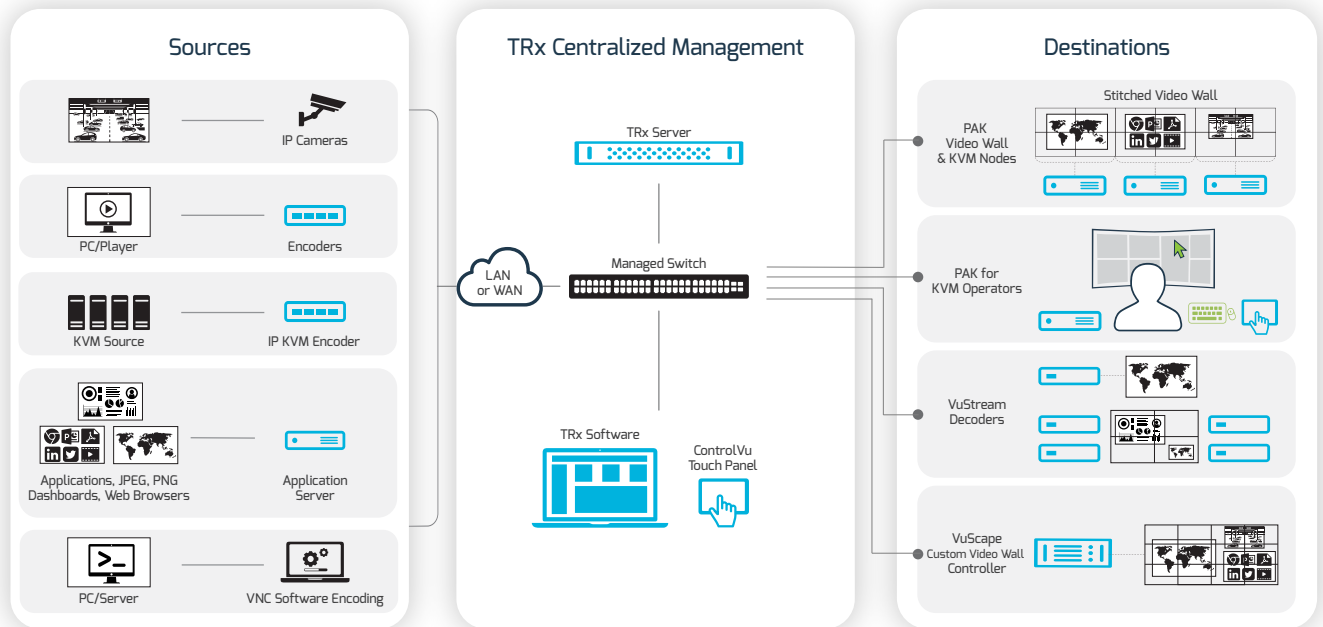

Manage multiple sites from one centralized platform and create custom control panels.

Control

Easily control sources locally or remotely from customized operator workstations.

Increasing Productivity and Enhancing Visualization Experiences in Professional and Mission-Critical Applications

VuWall develops innovative solutions for the easy and secure management of information on video walls and screens throughout facilities. Our technology simplifies workflows, enhancing operator efficiency through seamless interoperability and user-friendly design. VuWall solutions enable the distribution of content from any source to any display, video wall, or KVM operator station with an intuitive interface that features drag-and-drop functionality and customizable control panels.

TALK TO OUR VIDEO WALL EXPERTS We're here to help

VuWall is dedicated to developing innovative technology that is simplifying video wall and KVM deployments in control rooms. We are committed to helping you succeed. Our team will provide you the expertise you need to select the right technology and ensure that every project is specified right the first time.
